Experiment - 10

10. Visual Representation of Multiple Access Techniques

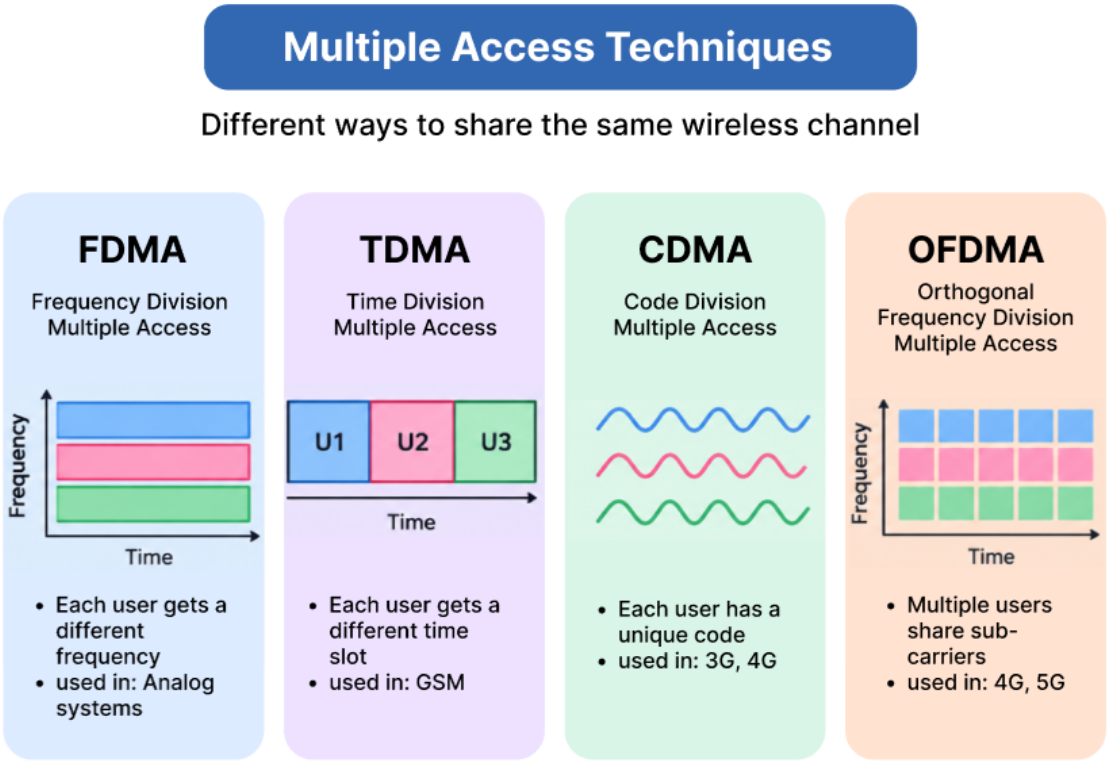

Aim:

To create a visual representation in Figma showcasing the differences between various multiple access techniques.

Procedure:

1. Open Figma and create a new design file.
2. Create a frame for the comparison diagram.
3. Add separate sections for FDMA, TDMA, and CDMA.
4. Draw frequency channels to explain FDMA.
5. Draw different time slots to explain TDMA.
6. Show code-based signal sharing to explain CDMA.
7. Add labels and short descriptions for each technique.
8. Use different colours and review the final comparison.

Output:

Result:

A visual comparison of FDMA, TDMA, and CDMA techniques was successfully created using Figma.
