Experiment - 5

5. Wireframe for a Mobile Application with Localization Features

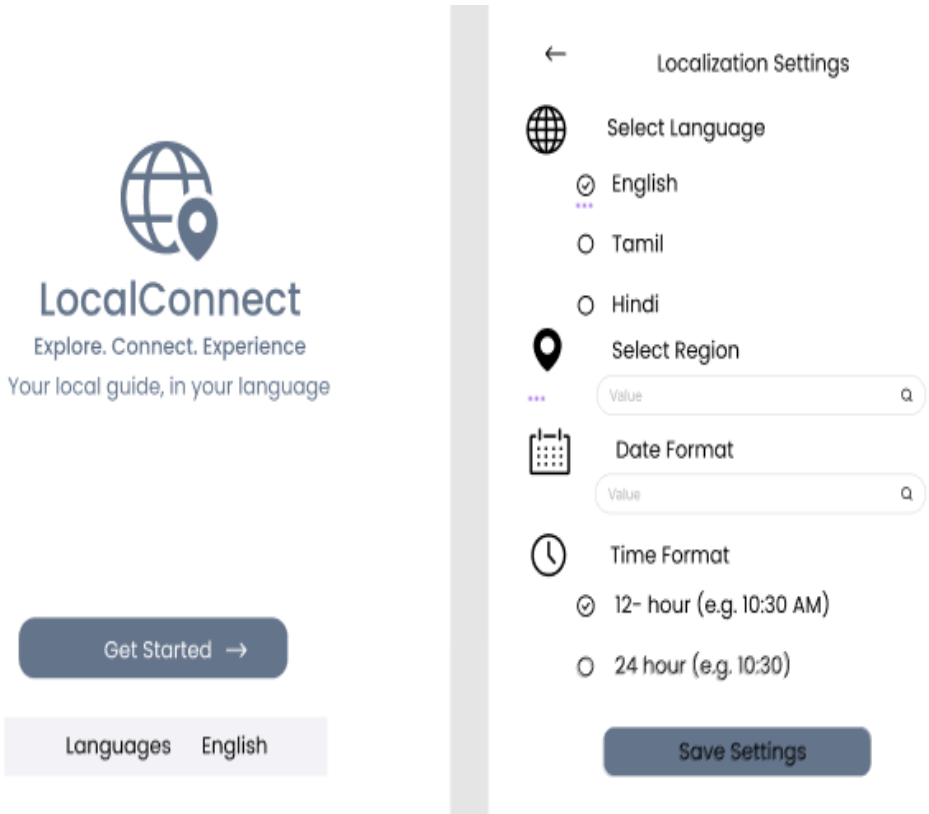

Aim:

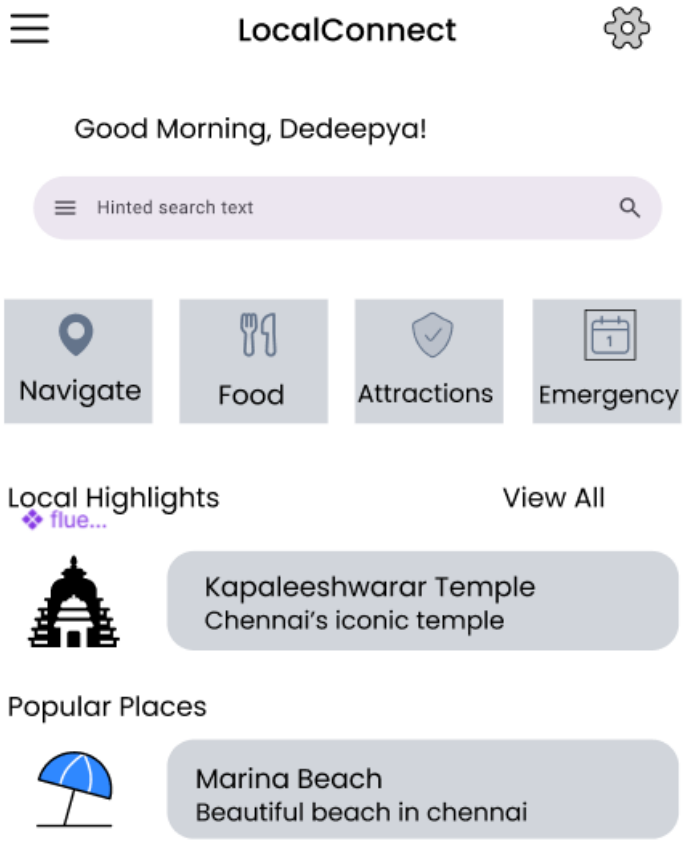

To design a wireframe for a mobile application that incorporates localization features using Figma.

Procedure:

1. Open Figma and create a new design file.
2. Create a mobile screen frame.
3. Design a simple home screen.
4. Add a location search option.
5. Include a map to display the user's current location.
6. Add location-based services and nearby places.
7. Connect the screens using the Prototype option.
8. Preview the wireframe and check its navigation.

Output:

Result:

A mobile application wireframe with localization features was successfully designed using Figma.
