Experiment - 7

7. Dashboard Prototype for Cellular System Performance

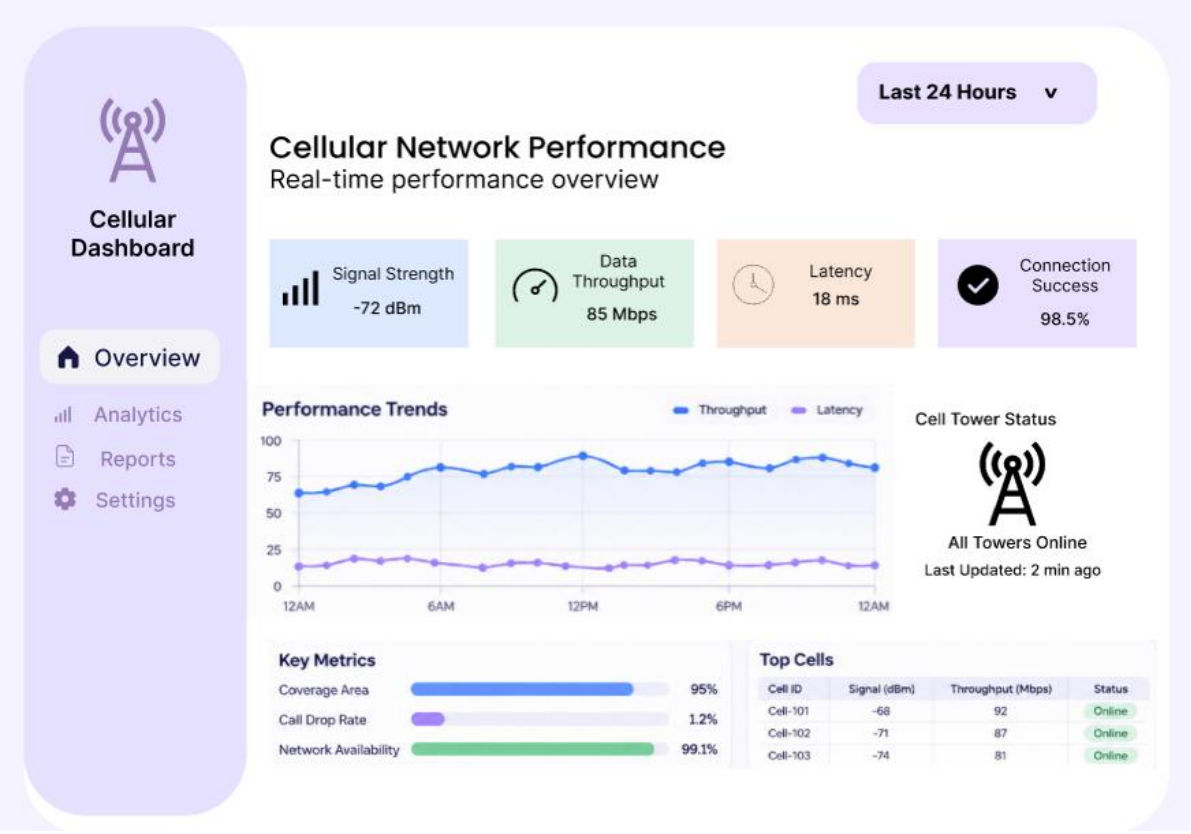

Aim:

To develop a dashboard prototype in Figma displaying performance criteria for a cellular system.

Procedure:

1. Open Figma and create a new design file.
2. Create a dashboard frame.
3. Add a suitable dashboard title.
4. Create cards to display network signal strength and bandwidth.
5. Add network speed and data usage indicators.
6. Include graphs to represent network performance.
7. Use colours and icons to improve readability.
8. Preview the dashboard and check the layout.

Output:

Result:

A cellular system performance dashboard prototype was successfully created using Figma.
