Experiment - 9

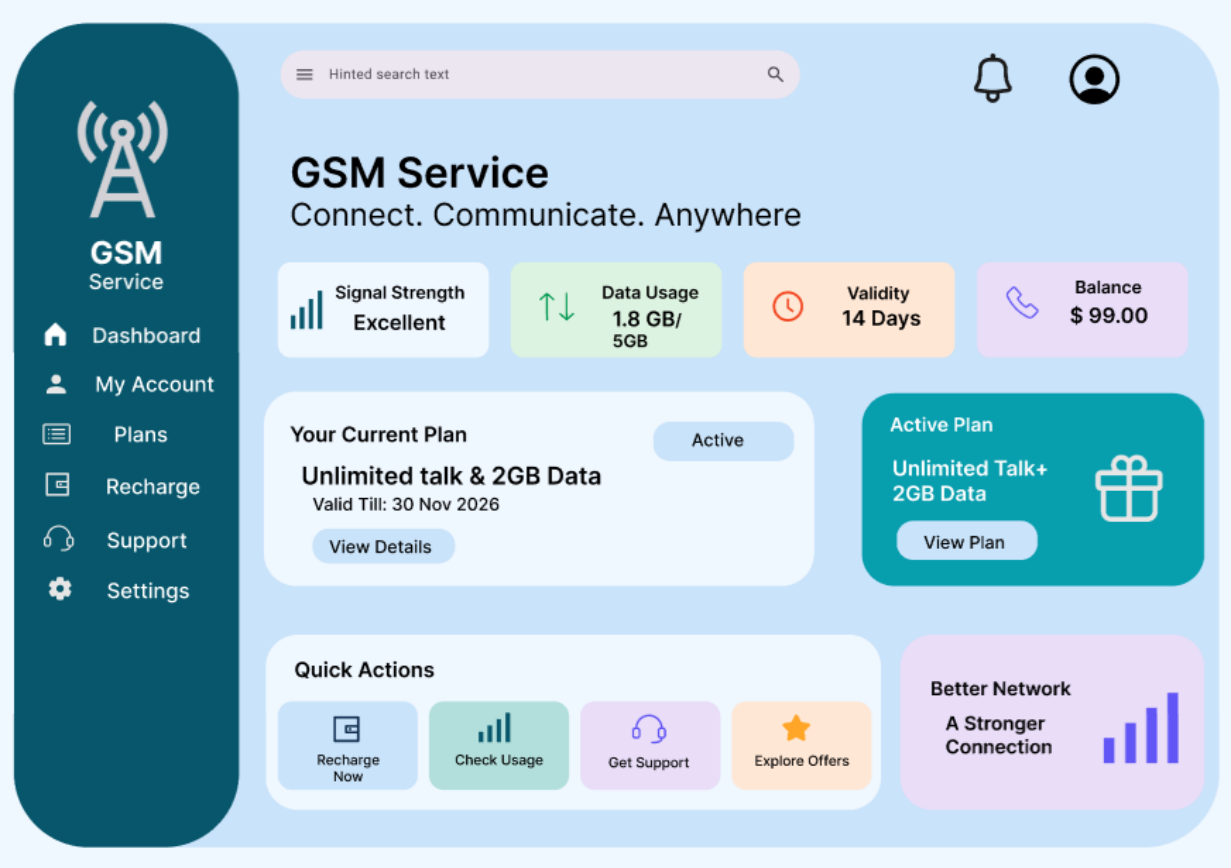

9. User Interface Prototype for a GSM Service

Aim:
To develop a user interface prototype for a GSM service using Figma.

Procedure:

1. Open Figma and create a new design file.
2. Create a mobile screen frame.
3. Design a home screen for GSM services.
4. Add calling and messaging options.
5. Include contact management and SIM information.
6. Add network signal and service status indicators.
7. Connect the screens using the Prototype option.
8. Preview and test the GSM service interface.

Output:

Result:
A GSM service user interface prototype was successfully developed using Figma.
