11. Wireframe for a Mobile Application with Security Measures

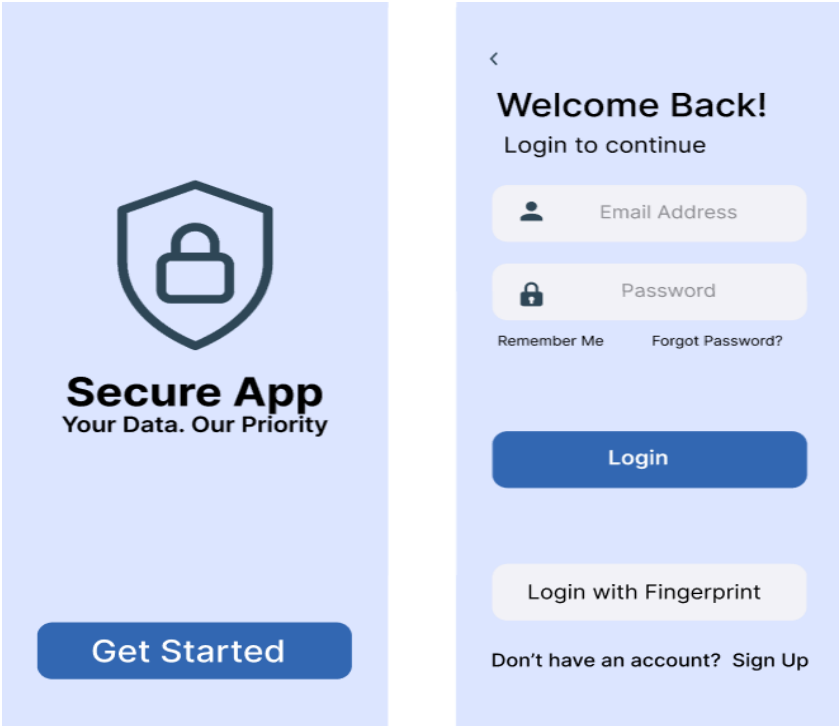

Aim:

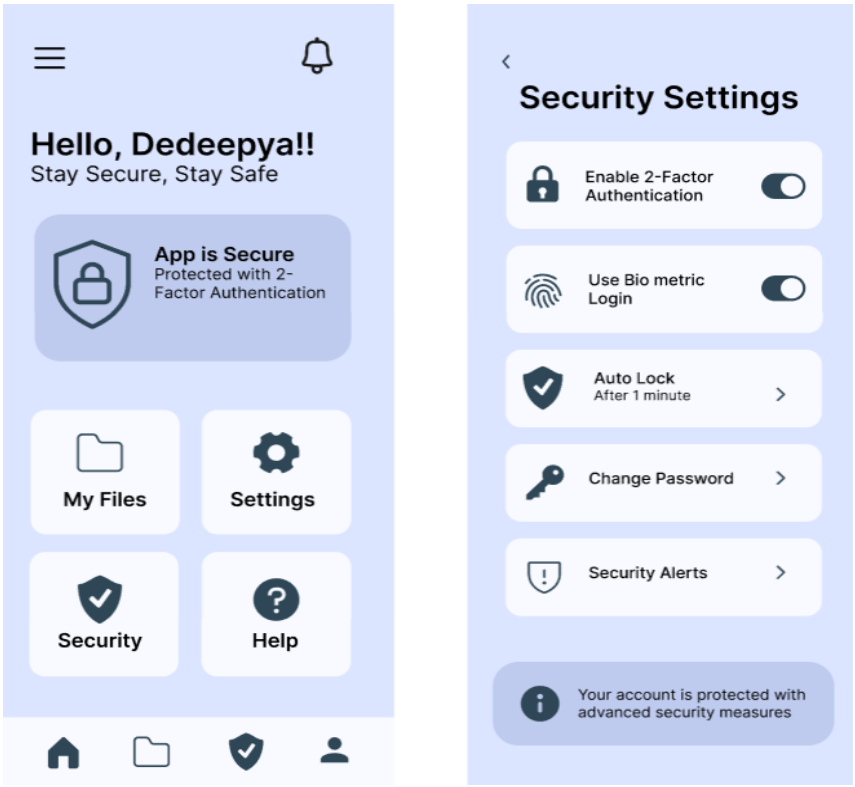

To design a wireframe for a mobile application that incorporates security measures using Figma.

Procedure:

1. Open Figma and create a new design file.
2. Create a mobile screen frame.
3. Design a login screen with username and password fields.
4. Add a password visibility option.
5. Include OTP verification for additional security.
6. Design a settings screen with privacy options.
7. Connect the screens using the Prototype option.
8. Preview the wireframe and check the navigation.
